MONTGOMERY, AL 36116-2455

*Helping children with special health care needs grow  
to their maximum potential.*

A division of the Alabama Department of **REHABILITATION SERVICES**

# CHILDREN'S Rehabilitation Service

Creating Partnerships - Building Futures

## FAMILY-CENTERED, COMMUNITY-BASED

A division of the Alabama Department of Rehabilitation Services, CRS is a statewide organization of health care professionals who are committed to providing quality medical rehabilitation, care coordination and support services for children and adolescents with special health care needs and their families. Every county in Alabama is served through a network of 15 community-based offices.

### ELIGIBILITY REQUIREMENTS

Any child or adolescent under 21 years of age, regardless of income, who is a resident of Alabama and has a special health care need may receive CRS services. Individuals with hemophilia are eligible for services beyond 21 years of age.

### FAMILY PARTICIPATION

Families participate in the cost of treatment for their child based on a sliding fee schedule and by using any Medicaid or insurance coverage.

CRS participates in Alabama's Early Intervention System for infants and toddlers and their families. Referral can be made by calling any CRS local office.

Anyone dissatisfied with any action related to delivery or denial of services may appeal the action to the local district supervisor.

In the provision of services and in employment practices, the Alabama Department of Rehabilitation Services does not discriminate on the basis of race, sex, creed, national origin, religion, age or disability.

This information is available in alternate format upon request. Rev. 2/03

Cooperation, understanding and teamwork are at the heart of CRS. Teams of physicians, nurses, social workers, physical therapists, audiologists, speech-language pathologists, occupational therapists and registered dietitians often are called upon to provide services to children and their families. Parents, family members, teachers, volunteers and others in the community are part of the child's rehabilitation.

CRS is committed to providing quality services within a system of care that is family-centered, community-based and coordinated with health, education and other resources.

### CRS IN SCHOOLS

CRS staff members work closely with local school systems to enable children with special health care needs to participate fully in school. Through services such as counseling, specialized therapy, and assistive technology for children and families, as well as disability training for teachers and other school staff, CRS offers the support vital to classroom success.

## CRS Programs

### Clinical Medical Program

Medical and related services for individuals with:

- orthopedic disorders
- scoliosis
- limb deficiency
- juvenile rheumatoid arthritis
- cleft lip and palate
- craniofacial conditions
- spina bifida
